

Diatom 11: 31-63 (英文)

塩野正道・リチャード・ジョルダン：福島県檜原湖の現生珪藻

Masamichi Shiono : Richard W. Jordan** : Recent diatoms of Lake Hibara, Fukushima Prefecture*

Abstract

A gravity core from Lake Hibara (Urabandai Plateau, Fukushima Prefecture) has been investigated, and a taxonomic study of the diatoms found within the sediments is presented here. The check-list includes some species rarely reported from Japanese lakes, and others with recently addressed nomenclatural problems. Over a hundred recognised taxa and some unidentified forms are illustrated.

Key index words

Taxonomy, Recent diatoms, Lake Hibara.
