Kazuo Haraguchi : Diatoms from Lake Aoki, Nagano Prefecture, Central Japan

Abstract

Diatoms in sediments from Lake Aoki, Nagano Pref. (Central Japan) were investigated. Epilithic and benthic diatoms were abundant in the samples but planktonic were rare. The check-list of 242 taxa includes 117 forms which were newly recorded in Lake Aoki. Taxonomically or distributionally noticeable taxa were illustrated.

Key index words

Diadema gallica var. *undulata*, Lake Aoki, recent diatoms, taxonomy.
