

Diatom 15: 149-164 (英文)

原口和夫：野尻湖の湖底泥から得た珪藻

Kazuo Haraguchi : Diatoms from Lake Nojiri, Nagano Prefecture, central Japan.

Abstract

Diatom assemblage in the sediment of Lake Nojiri was examined. A total of 245 taxa among 42 genera were recorded. All taxa, which occurred abundantly, were planktonic species, *i. e.* *Fragilaria fasciculata*, *F. crotonensis*, *Asterionella formosa*, *Cyclotella radiosa*, *C. stelligera*, *Aulacoseira itarica*.

Key index words

diatom-flora, Lake Nojiri, taxonomy.
