

Diatom 9: 73-81 (英文)

アイシア サレー・ヌーライニ アブドウル ラヒム : マレーシアのテムプラー公園のカンチング川の珪藻

Aishah Salleh and Nooraini Abdul Rahim : Diatoms of the River Kanching, Templer Park, Malaysia

Abstract

Diatom populations from the River Kanching, Templer Park, Malaysia were investigated from August 13 to November 5, 1991. The 97 taxa from 27 genera were recorded. *Gomphonema carolinense*, *G. clevei*, *G. acuminatum* and *G. longiceps* were major diatoms in this river. The following four taxa are new record for Malaysia : *Aulacoseira ambigua*, *A. subarctica*, *Anomoeoneis serians* var. *apiculata* and *Navicula monmouthiana-stodderi* var. *monmouthiana-stodderi*.
